Project Description and Scope

This project assesses the potential for utilizing the City tax lien and foreclosure processes as part of an Inner Loop revitalization program. Analysis focuses on tax delinquencies and liens, foreclosures, and comparable programs in selected U.S. cities.

This assessment describes and links the diverse elements that comprise the City's delinquent tax, lien (used interchangeably in this report with delinquency), and foreclosure procedures. Properties that have been foreclosed by the City, or can be in the future, are assessed for their revitalization potential.

Data Sources

The 1992 delinquent tax database used for this assessment was provided by the City's Finance & Administration (F&A) Department and based on Harris County Tax Assessor records. F&A also forwarded tables listing the characteristics of foreclosed properties held by the City in trust. Geographic data on demolition liens, weed cuts, and dangerous buildings were furnished by the Building Inspections Division in the Public Works & Engineering Department. The Data Systems Division in the Planning & Development Department verified addresses and plotted maps. The Legal Department's Tax & Revenue Section supplied pertinent information about the lien to foreclosure process. Through phone interviews and literature searches, the project team collected data on the revitalization programs, lien, and foreclosure procedures of selected U.S. cities.

Foreclosed Property Characteristics

City-wide foreclosures and redemption. Only 224 properties have ever been foreclosed by the City for tax delinquency, and only since 1989. As of March 1994, only one of the 224 foreclosures was sold. Five were redeemed. Seventy-nine (36.2%) of the remaining 218 properties are located inside the I-610 (Inner) Loop.

Properties that are neither homesteads nor in agricultural use can be redeemed, by law, in the first six months after foreclosure. These properties may be released to the owner provided that the owner pays the judgement amount (i.e., taxes, penalty, interest, and other costs), attorney's fees, constable fees, service and notice fees, and accrued interest. A 25-percent redemption fee payable to the City is added to the total due. For homesteads and agricultural properties, the redemption permitted during the second year includes a 50-percent penalty.

Inner Loop foreclosures. Of the total 79 foreclosures, redemption periods have expired on 73 properties. Two others are expiring in late 1994 and four properties have no reported date for redemption. Most Inner Loop foreclosures (74.7%) are vacant properties with no improvements.

The 79 foreclosures average \$7,459.13 in taxes owed and \$23,037.09 in appraised value, or a ratio of .32 that signifies that the mean tax owed is 32 percent of appraisal. Table A-1 lists the Inner Loop properties which have been foreclosed by the City of Houston. The general location of the foreclosures is shown by improvement and occupancy status in Figures 5, 6, and 7 on pages 21 through 23 of this report.

Delinquent and Lien Property Characteristics

(The following discussion is based on 1992 and older delinquent taxes, status as of June 15, 1993.)

Overview of Inner Loop tax delinquencies. There are 20,223 Harris County Appraisal District (HCAD) property accounts in the Inner Loop with at least one incidence of delinquent taxes. The number of accounts does not correspond with the number of parcels of land because a parcel may include several improvements on the site that are individually assessed and taxed. Condominiums exemplify this.

The 20,223 HCAD accounts cover 134,242 occurrences of tax delinquency. Some accounts reflect a single incidence of delinquent tax while other accounts contain multiple incidences that show the accounts owed taxes year after year. For this report, the total taxes owed on each account have been calculated to provide a cumulative delinquent value. However, after eliminating zero delinquent values and other meaningless tax records from the 20,223 HCAD accounts, the number of accounts in the Inner Loop with at least one delinquency becomes 17,671 and, hereafter, serves as our effective total.

Delinquent tax, penalty, and interest calculation. Texas law does not permit forgiveness of tax liens, but Section 33.05 of the Property Tax Code does limit delinquent tax collection to 20 years. For example, taxes that were initially delinquent in 1970 and unpaid through 1993 would be payable from 1972 through 1993, plus penalty and interest. The penalty and interest rate varies over the 20-year period, decreasing with each progressive month and year. **Table B-1 in Appendix B** lists the penalty and interest rates effective for delinquencies payable from June 1993 to June 1994.

To obtain realistic sums and ratios for analysis, all delinquent records over 20 years old in any account were not included in the calculations since those taxes could not be collected by law. Penalty and interest were calculated by multiplying the rate (for the month and year of payment) with the "base" tax owed for the year it was first delinquent. The penalty and interest were added back to the base tax and summed by HCAD account number, resulting in the "*grand* delinquent total" for each property. **Table B-2** provides a simulated calculation of an imaginary HCAD account. Furthermore, legal fees generally constituted 15 percent in addition to the tax owed plus penalty and interest (P&I).

Delinquent tax characteristics. The distribution of tax lien characteristics needs to be examined in order to identify indicators of revitalization and/or property decline. The range and frequency distribution for the variables that may be used to indicate repeated tax delinquency, by HCAD account, are shown in a series of tables in **Appendix C**: (1) number of years of delinquency, (2) year of first delinquency, (3) total tax owed without penalty and interest, (4) appraised value, (5) improvement value, (6) ratio of total taxes owed, with penalty and interest, to appraised value, and (7) ratio of total taxes owed, with penalty and interest, to appraised value excluding homesteads. Total sums, means, and median values have been calculated to offer a basis for comparison.

Table C-1 shows that over half (50.9%) of the 17,671 total delinquencies have owed taxes for four or more years. About one-fourth (24.2%) of all accounts have owed taxes for ten years or more. Specifying the year a property initially owed taxes, **Table C-2** depicts the chronic status of many delinquent accounts. Nearly half (49.4%) have been delinquent prior to, and including, 1987. One-fifth (20.5%) of the properties owe taxes first delinquent in 1980 or earlier.

The total taxes owed on the 17,671 accounts inside the Loop was \$9,365,920.62, not including the penalty and interest due. As shown in **Table C-3**, the taxes owed per account averaged \$530.02. The total appraised value for the 17,671 properties was \$799,669,640, with an average appraisal of \$45,253.22 (**Table C-4**). The total improvement value, which is the value of the structure on the site, amounted to \$420,929,950. The average improvement value was \$23,820.38 as described in **Table C-5**.

When penalty and interest are added to the taxes owed, called "*grand delinquency*" in this report, the 17,671 accounts total \$68,430,962.13 (**Table C-6**). The mean ratio of taxes owed (plus P&I) to appraised value is .153. In short, the grand delinquency averages 15.3 percent of appraisal.

Up to this point, homesteads have been included in the 17,671 total. However, the City exempts homesteads from tax foreclosure. Therefore, the 3,099 delinquent accounts classified as exempted homesteads should be excluded from the total. The total tax owed on the remaining 14,572 accounts, adding penalty and interest, is \$59,777,544.69 (Table C-7). The grand delinquency averages 17.3 percent of appraised value.

A Process: From Delinquent Taxes to Liens to Foreclosure

From delinquent taxes to liens. Properties first become delinquent 30 days after the tax due date on January 1 of each year. On February 1, a statutory tax lien attaches to each property until its owner pays the tax due for that year. In the first five months of the lien, the account is "current" delinquent.* Penalty and interest accrue. If unpaid by July 1, the starting fiscal year, the account turns "delinquent" delinquent.* A "Joint Venture" partnership established between the City and a private law firm then enforces payment. It aims to maximize the collection of property tax revenues. **Figures 1 and 2** provide, respectively, visual and procedural details.

As it is neither possible nor profitable for the law firm to pursue collection on each and every account for the year, the Joint Venture targets properties whose owners would rather pay than risk additional penalties and foreclosure of their property. Selection criteria include properties with high equity and business or rental income. Notices demanding payment are sent. Many owners pay during this period. The Joint Venture files a petition in court, suing for the lien amounts on the unpaid accounts. However, by law, taxes delinquent for more than 20 years cannot be collected. The court's judgement orders tax payment and, as needed, the sale of property to cover unpaid taxes, penalty, interest, and other charges.

From liens to foreclosures. Property foreclosure is an elective step for the City, initiated by the order of sale. If the City decides to foreclose on a property, it must send the order to the Constable (Sheriff) and post the pending sale or auction. The sale is held and, if bids are accepted, the properties are sold with quit claim deeds and placed back on the tax roll. Properties that are not sold are struck-off and deeded to the City as trustee.

Foreclosed property may be redeemed by the original owner. The redemption period is six months from the time the deed is filed at the Harris County Courthouse, except for homesteads and agricultural uses which are accorded two years. As a matter of City policy, the City has never foreclosed on homesteads, though it may legally do so. The redemption period for properties not sold begins when the City files the deed forwarded by the Constable. **Table D-1 in Appendix D** describes the procedure and cost of redeeming or buying foreclosed property.

* "Current" delinquent taxes and "delinquent" delinquent taxes are part of the terminology used by the Tax & Revenue Section of the City's Legal Department.

FIGURE 1: DELINQUENT TAX, LIEN, AND FORECLOSURE PROCESS

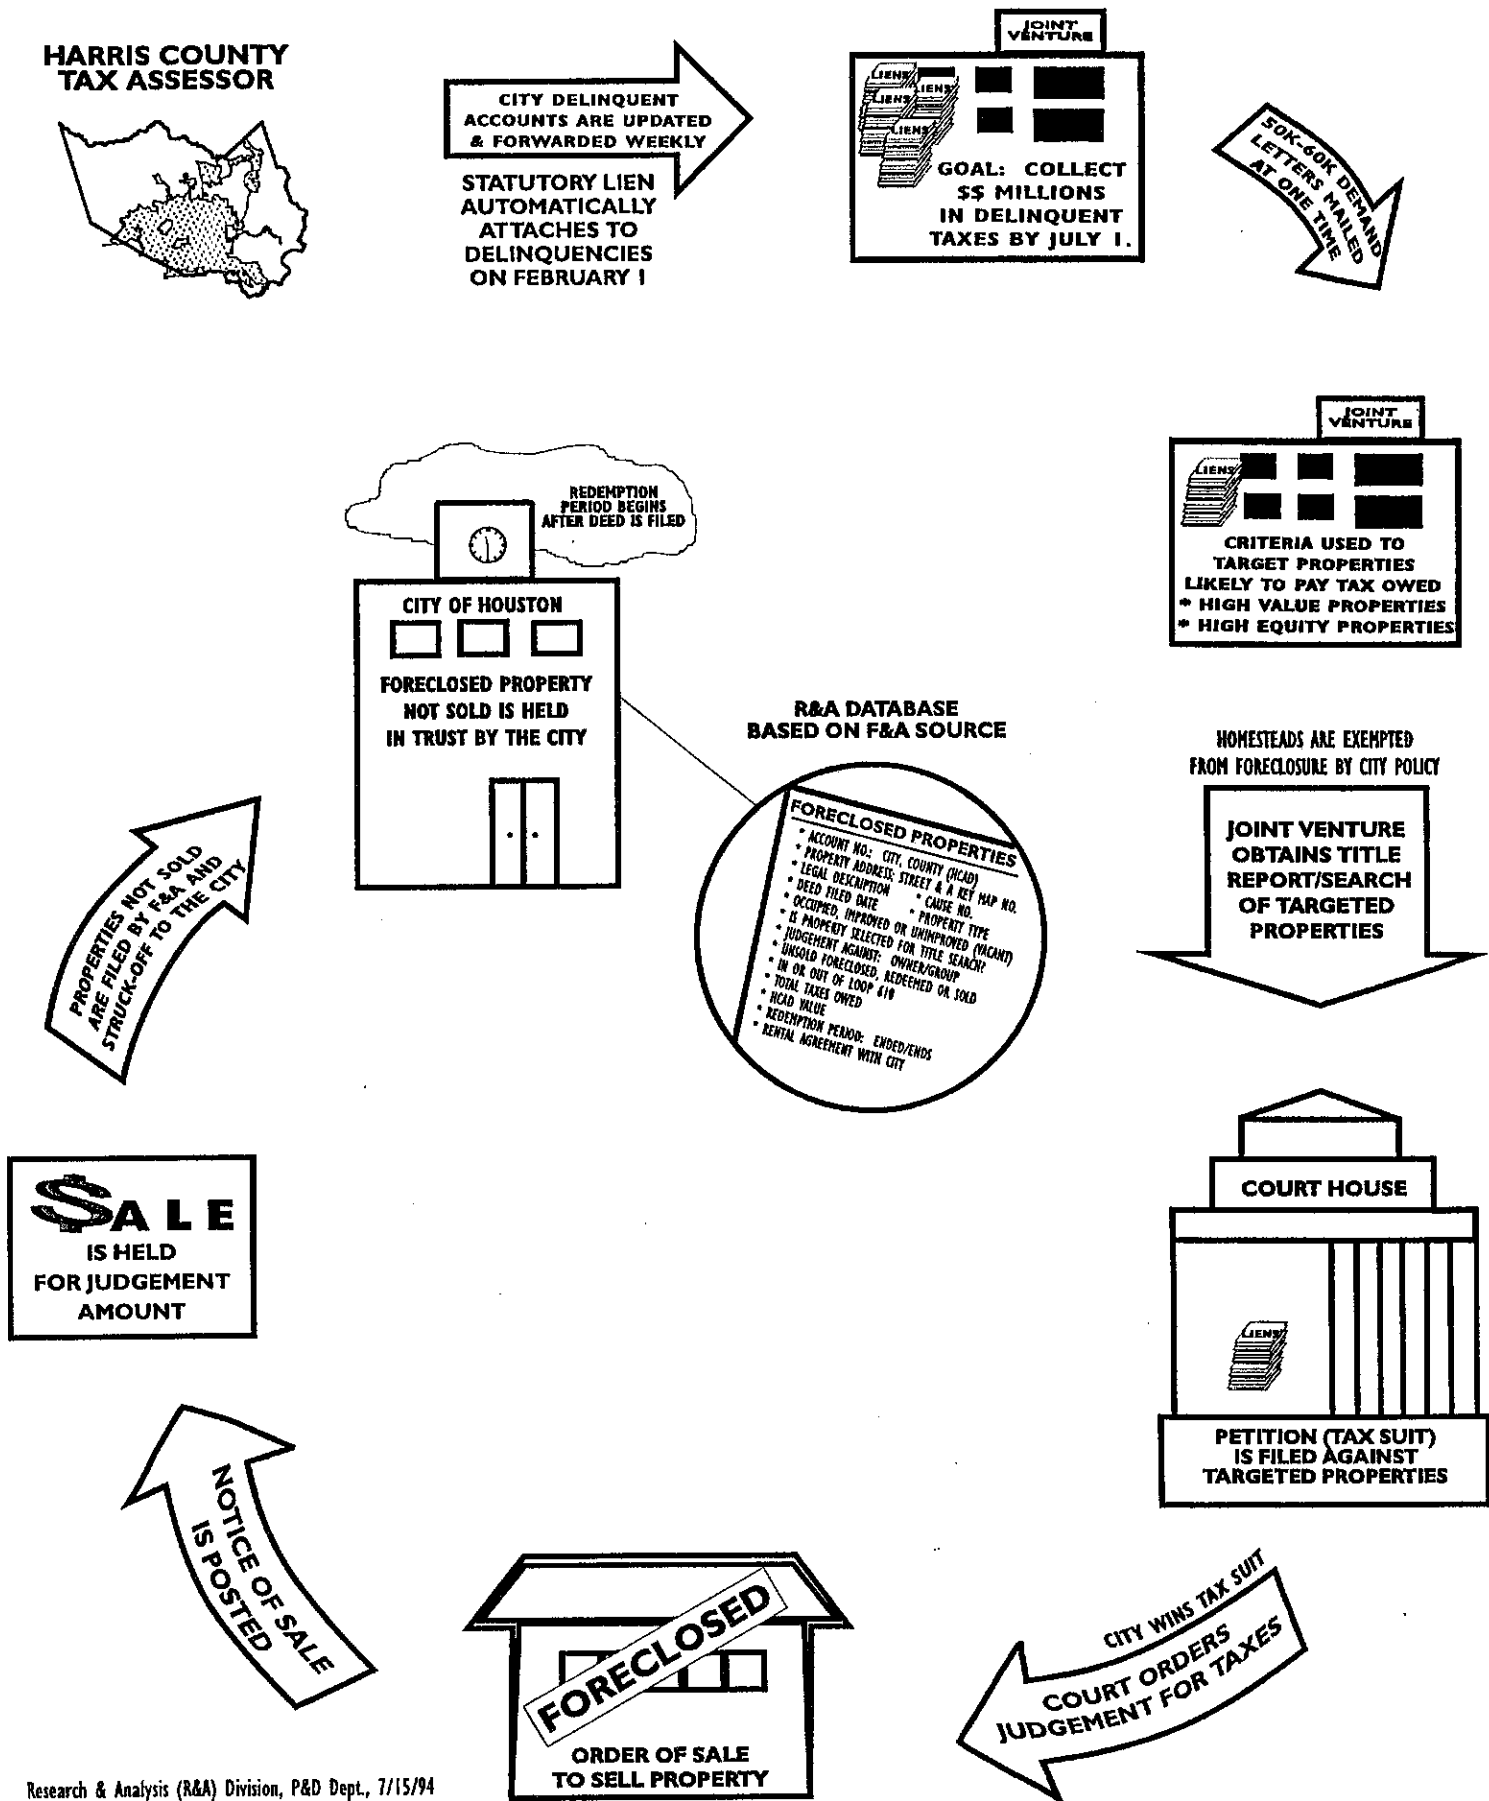

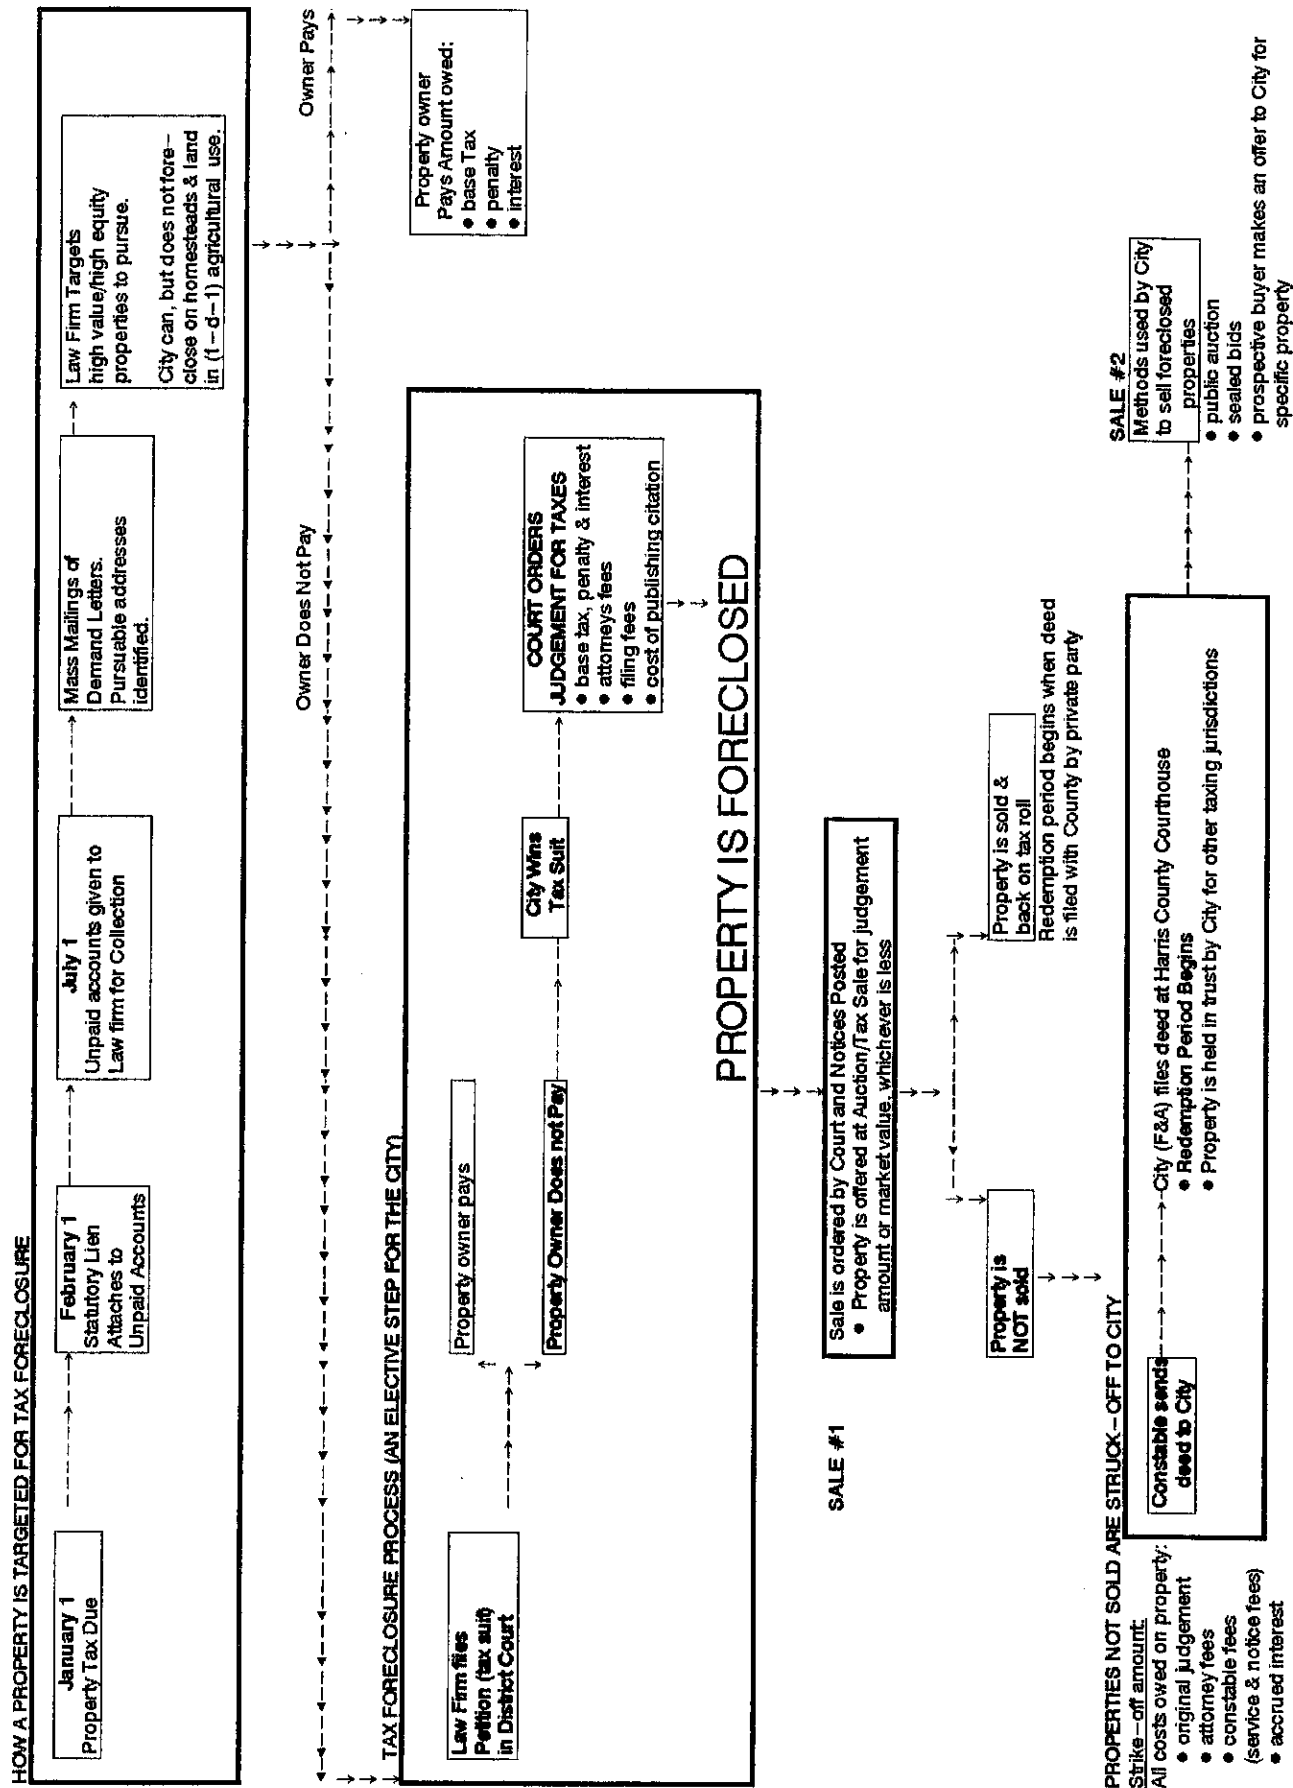

FIGURE 2: CITY OF HOUSTON TAX DELINQUENCY TO FORECLOSURE PROCESS

Considerations for Revitalization

Limitations of the existing lien to foreclosure process. The Joint Venture's processing of tax liens into accounts targeted for collection, and possible foreclosure, identifies properties that yield the most taxes collected from a limited number of delinquent accounts. The Joint Venture uses high equities, high delinquent taxes, and income-generating activity to identify which properties to pursue to maximize returns. The collection goal for delinquent 1992 taxes was \$24 million of the \$97.7 million in "delinquent" delinquent taxes. The law firm exceeded the mark by \$9 million, collecting over \$33 million in taxes not including penalty and interest.

Targeting of valued properties. The revenue-raising strategy is designed to select properties of value to owners. Since tax collection goals are set annually, it is unlikely that a property's history of taxes owed will be used to target properties for collection. In contrast, multiple-year delinquencies constitute one indicator of decaying properties that may offer potential for revitalization. Even if foreclosure results, a property chosen first for its revenue collection potential is not necessarily an appropriate revitalization target.

Title problems. Of the 224 properties foreclosed by the City, six were sold or redeemed. The remaining 218 foreclosures are residual properties with title problems, according to the City's Legal Department, Tax and Revenue Section.

Little or no relation to property decline. Properties targeted by the Joint Venture are independent of any direct relation to property decline. Indicators of declining properties such as nuisance violations are not addressed in the existing lien to foreclosure process.

Little or no relation to City maintenance. Another limitation of the current lien to foreclosure process is its lack of correlation to the costs of the City maintaining tax-lien and/or nuisance properties. Every time the City abates a nuisance on a property or otherwise services a nuisance-related situation, a lien is placed on the offending property. The abatement is typically done after repeated notices to the owner to abate the problem are not heeded.

For example, because overgrown weeds are a nuisance, a property whose weeds have been cut repeatedly by the City characterizes the City's investment of time, costs, and staff resources. These services subtract from the revenue the City receives from the property's tax payment. For chronically tax delinquent properties that also have City-abated nuisances, the City is in effect supporting and maintaining these non-taxpaying properties. **Whenever properties become this unproductive and demanding of continuing City resources, they are prospects for revitalization.**

Significance of 1992 and older delinquent taxes. Tax liens are privileged liens that precede all other liens on a property. Because it can lead to foreclosure, it is a powerful mechanism for enforcing other judgements on a property. Depending on the value and duration of the delinquency, tax liens also indicate property decline.

Significance of nuisance violations and city abatements. Three major types of nuisance violations that have resulted, or will result, in City liens are selected for further analysis in this report: dangerous buildings, demolitions, and weed cuts. A fourth nuisance category, illegal dumpsites, is chosen because its impact accelerates declining neighborhood standards. It includes illegal dumpsites that are under investigation in the City's Rat-on-A-Rat program or abated (cleaned up) by either owner or the City. The significance of these nuisance violations as variables for consideration for revitalization lies in their ability to indicate properties in decline that demand City upkeep in terms of inspection and/or abatement. Having many properties with multiple violations or City abatement of the same nuisance only increases the demand on City resources.

Targeting candidate properties for revitalization. 17,671 HCAD accounts report at least one incidence of tax delinquency. Because one or two tax delinquencies attributed to a property may not necessarily reflect decay or neglect, it would be futile to pursue all 17,671 accounts as candidates for revitalization. Since homesteads, i.e., owner-occupied primary residences, are never foreclosed by the City, as a matter of policy, the total to be further reviewed is the 14,572 accounts.

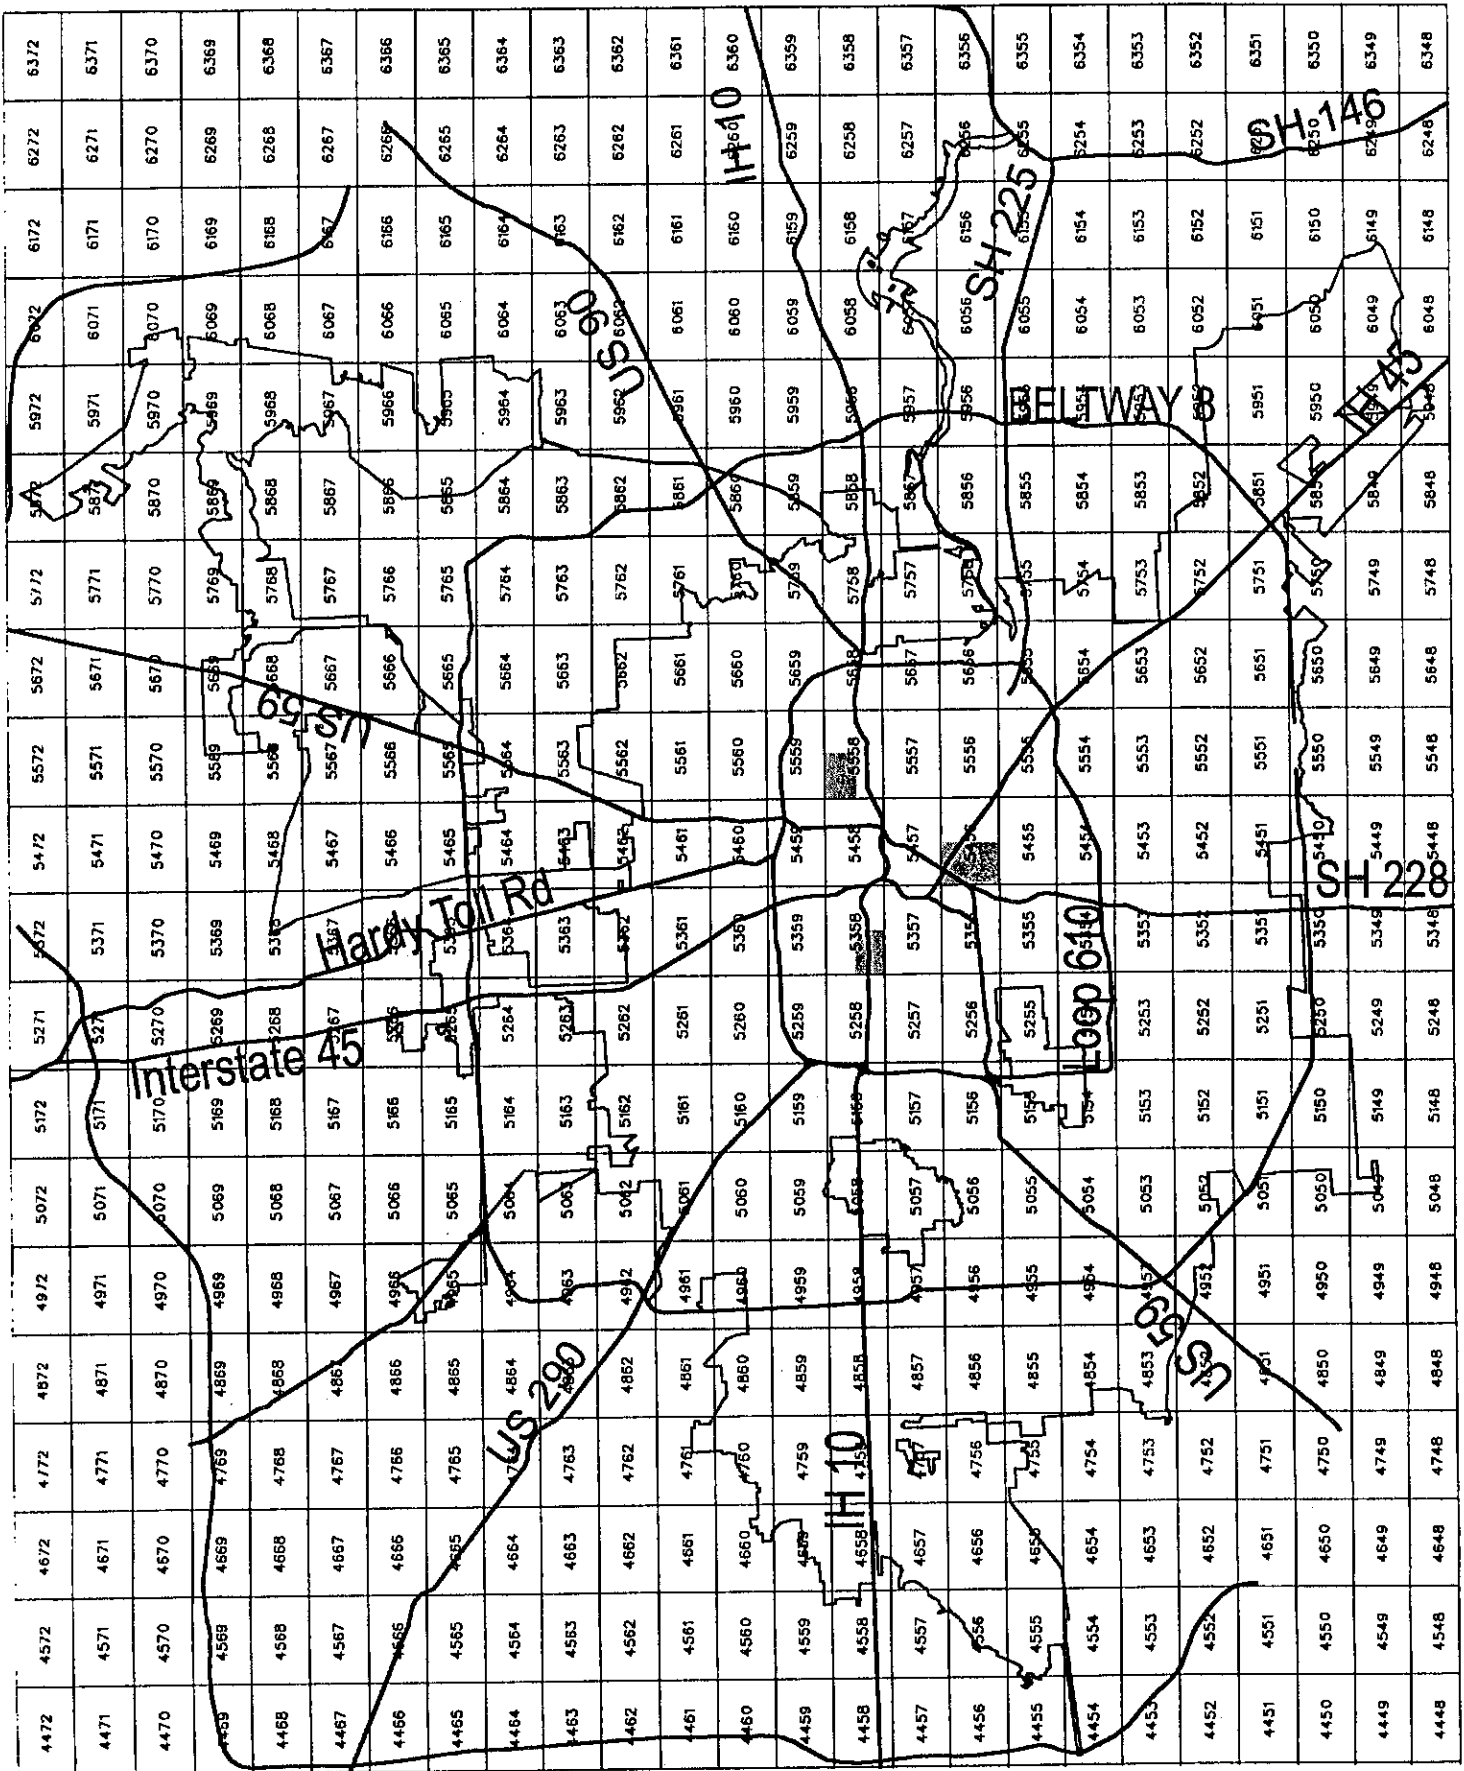

In examining the 14,572 accounts, the consideration of properties was limited only to properties where the total taxes owed, plus interest and penalties, equaled or exceeded 40.5 percent of assessed value. The 40.5 percent criterion was the basis for identifying the most extreme delinquencies relative to assessed values. The delineation yielded 2,286 of the 14,572 accounts (15.7%) and represented most of oldest delinquencies in the database, based on the interest and penalties owed on the accounts.

Further analysis led to the preliminary identification of four quarter-quads displaying clusters of delinquencies at or above the 40.5 percent criterion where properties may be considered in a foreclosure-to-revitalization program. The four quarter-quads identified in **Figure 3** are 5358C in Olive Wood, 5558A in the Fifth Ward, and 5456A and 5456C in the Third Ward. **Maps 1a, 2a, 3a, and 4a** show the locations of the delinquent properties. Counterpart **Maps 1b, 2b, 3b, and 4b** illustrate the land uses in the quarter-quads. **Table 1** accompanying the maps summarizes the occurrences of nuisances, foreclosures, and delinquent properties by quarter-quad. For property details, **Table E-1** in **Appendix E** lists the targeted delinquencies found in the four quarter-quads. The shaded area in **Table A-1** reflects the foreclosed properties in the Inner Loop quarter-quads.

Analysis of targeted areas. A high incidence of reported property nuisance situations and liens is found in neighborhoods with substantial numbers of high tax-delinquent properties. Due to inexact addressing, especially of vacant lots, a nuisance adjoining a tax delinquency is assumed to be situated on the same property.

Quarter-quad 5358C in Olive Wood contains an estimated 22 tax-delinquent properties with at least one nuisance situation or lien. The largest cluster of properties, ten sites, in 5358C with these characteristics occurs north of the railroad tracks along Hicks Street between Studemont Street and Heights Boulevard. Land use in the vicinity is a mix of residential use and many vacant lots.

Quarter-quad 5456A in the Third Ward contains approximately 48 tax-delinquent properties with nuisances or liens. Large concentrations of properties in 5456A with these attributes occur south of the juncture of U.S. Highway 59 and Interstate 45, along Dowling and Sauer Streets. Land use in the area is mixed--residential, commercial, and institutional--and interspersed with vacant lots.

Quarter-quad 5456C in the Third Ward contains an estimated 24 tax-delinquent properties with at least one nuisance situation or lien. Concentrations of properties with these characteristics in 5456C in the area occur north of Elgin Avenue and west of Scott Street. The predominant land use in the vicinity is single-family residential. Some commercial uses and vacant parcels are scattered throughout the area.

Quarter-quad 5558A in the Fifth Ward has approximately 29 tax-delinquent properties with nuisances or liens. Though virtually all of the properties with these attributes occur north and west of the railroad tracks, no single, dense concentration of such properties is noted. Land use is single-family residential interspersed with some vacant lots.

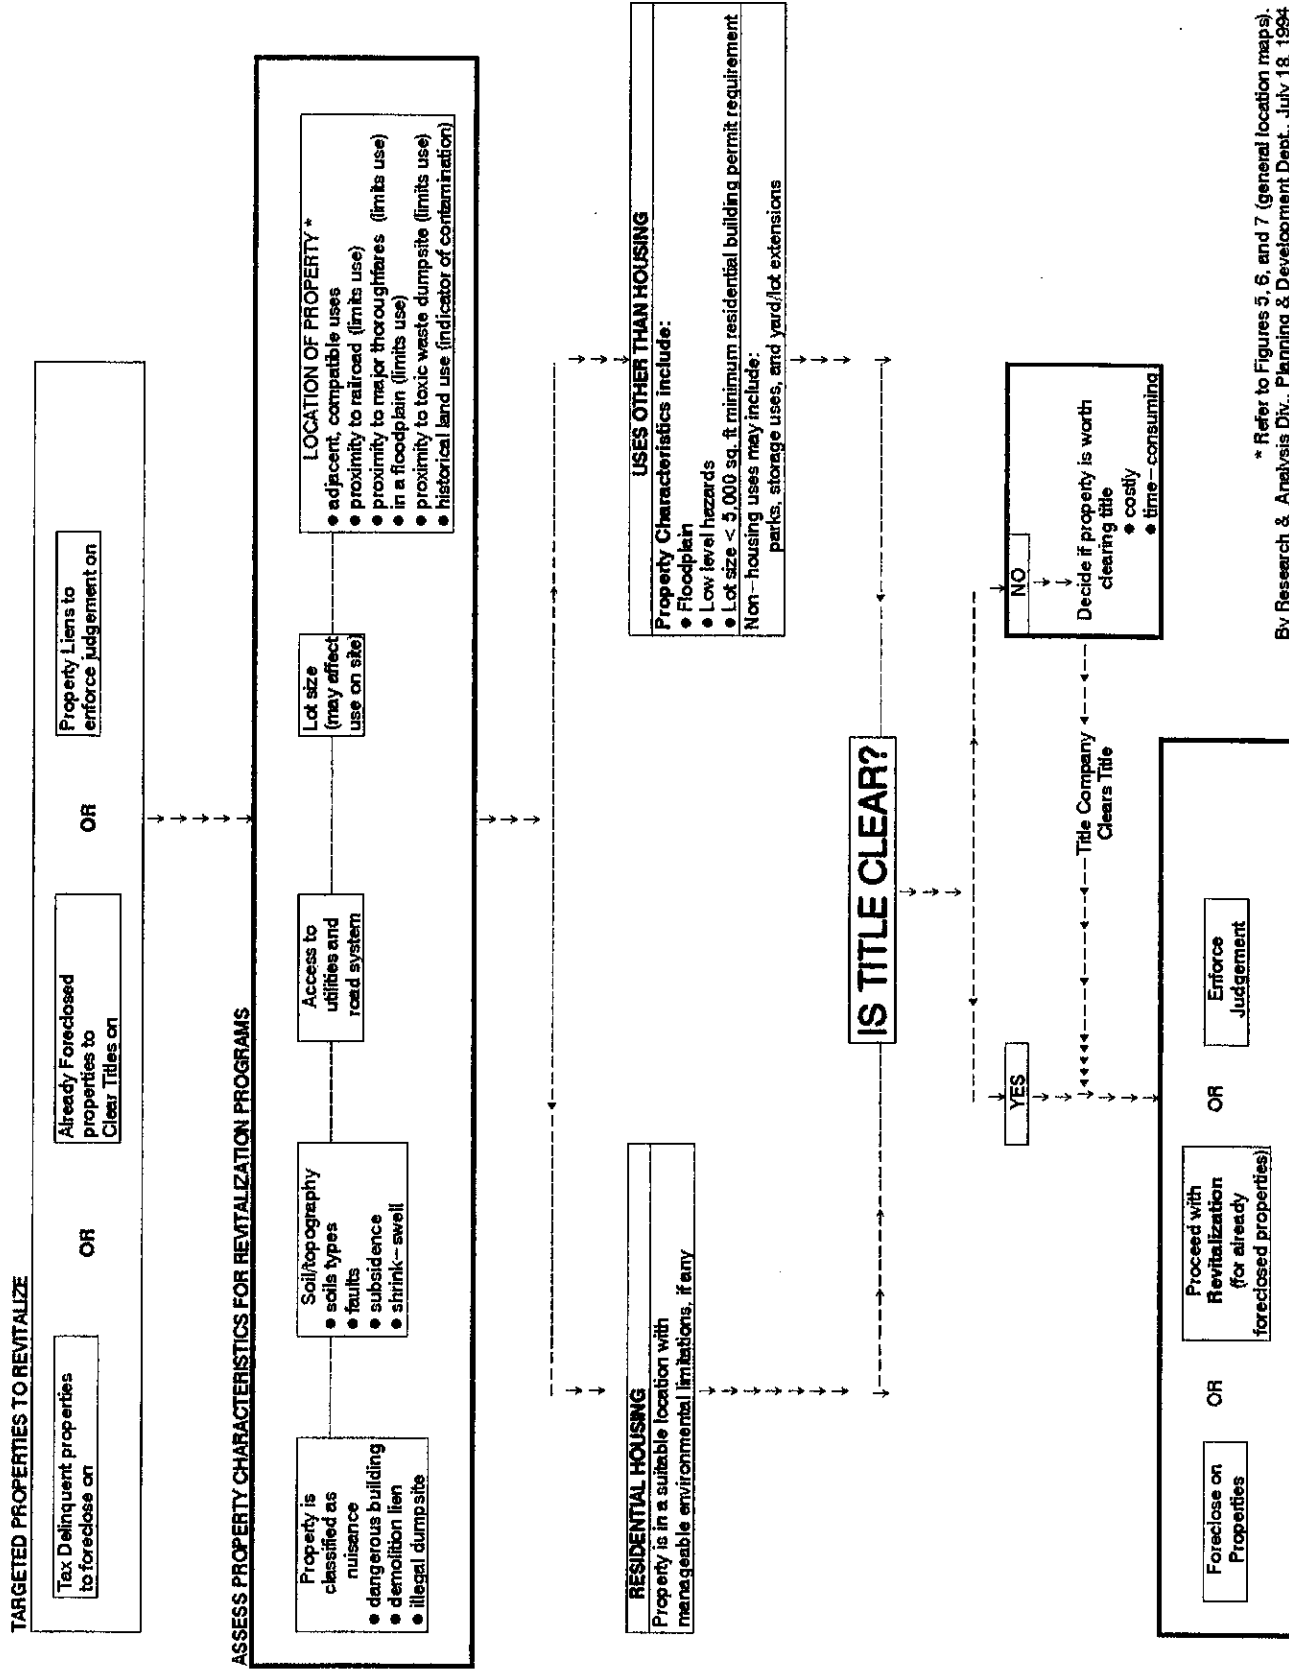

Other property requirements for revitalization. Properties must meet additional qualifications to be considered in a revitalization program. The requirements apply to properties already foreclosed, targeted for foreclosure, or with enforceable court judgements. For example, City revitalization programs use only properties with clear titles. Other property liens (e.g.: demolitions and weed cuts) must be also evaluated before making a decision to enforce judgement to acquire the properties for revitalization. Figure 4 details procedures that evaluate whether properties warrant revitalization.

Other criteria help filter out properties that may be difficult to sell by the City. Hard-to-sell properties include those at hazardous sites, by railroads and thoroughfares. Unless a ready buyer initiates the effort, the criteria and procedures also determine if the time and expense to be invested by the City to use or foreclose properties for revitalization, as well as clear titles, are worthwhile. The expansion of a database that integrates property characteristics and revitalization requirements and the creation of a board to assess properties are the core of an effective program, but not currently in place in the City. Figures 5, 6, and 7 illustrate some features in the physical environment that may determine a foreclosed property's candidacy in a revitalization program.

Programs in Selected Cities in the U.S.

Property liens and foreclosure process. The cities of Atlanta, Dallas, San Antonio, New Orleans, Philadelphia, and Minneapolis provided information on the various ways city liens, including abatement and tax, are attached and paid (Table F-1 in Appendix F). Three cities--New Orleans, Minneapolis, and San Antonio--do not foreclose properties with code violations such as demolition liens, like the City of Houston.

Each city has its own procedures. Philadelphia applies a non-utilization tax on abandoned and vacant buildings and can seize properties pursuant to a declaration of a public nuisance. Atlanta gives property owners four years to pay property liens before seizure. Minneapolis assesses nuisance charges directly to taxes; if the owner does not abate the nuisance, the tax assessor is notified of a special assessment. Dallas does not foreclose only on demolition liens, it requires that the properties also be tax delinquent **Table F-2 in Appendix F**.

The City of Dallas tax foreclosure process, shown in **Figure 8**, is of particular interest because it is governed by the same state laws as Houston. Using a master property list, Dallas forecloses on tax delinquent properties that are vacant lots characterized by neglect. The foreclosed vacant lots not sold at the first tax sale are included on the infill list to be sold for new construction. Under state law, the city is not allowed to selectively enforce tax collection or foreclosure more in one area over another, even though the majority of tax delinquent properties cluster in areas that need revitalization. **Appendix G** contains supplementary details of Dallas' foreclosure procedures and compares them to Houston's practices.

The revitalization potential of the Dallas system is enhanced by several characteristics: (1) all taxing entities agree that properties remaining after the first tax sale may be sold for less than the amount of the judgement; (2) the property is thereafter deeded to the City of Dallas; and (3) clear title on the property is assured before foreclosure, and it is sold only with a quit claim deed that does not warrant the property.

Revitalization programs. A literature review, described in **Table F-2 in Appendix F**, provided most of the information about revitalization programs in other U.S. cities. Other cities responded directly to the revitalization inquiry.

Boston and Milwaukee each has a master database that contains tax and property-related data. Atlanta uses a Land Bank Authority, while Boston operates a community-controlled land trust. Boston and Philadelphia use eminent domain and, like Dallas, have a process that assesses a developer's rehabilitation proposal or new construction on vacant land. Boston prohibits owners from redeeming property if they do not guarantee the development and upkeep of vacant land.

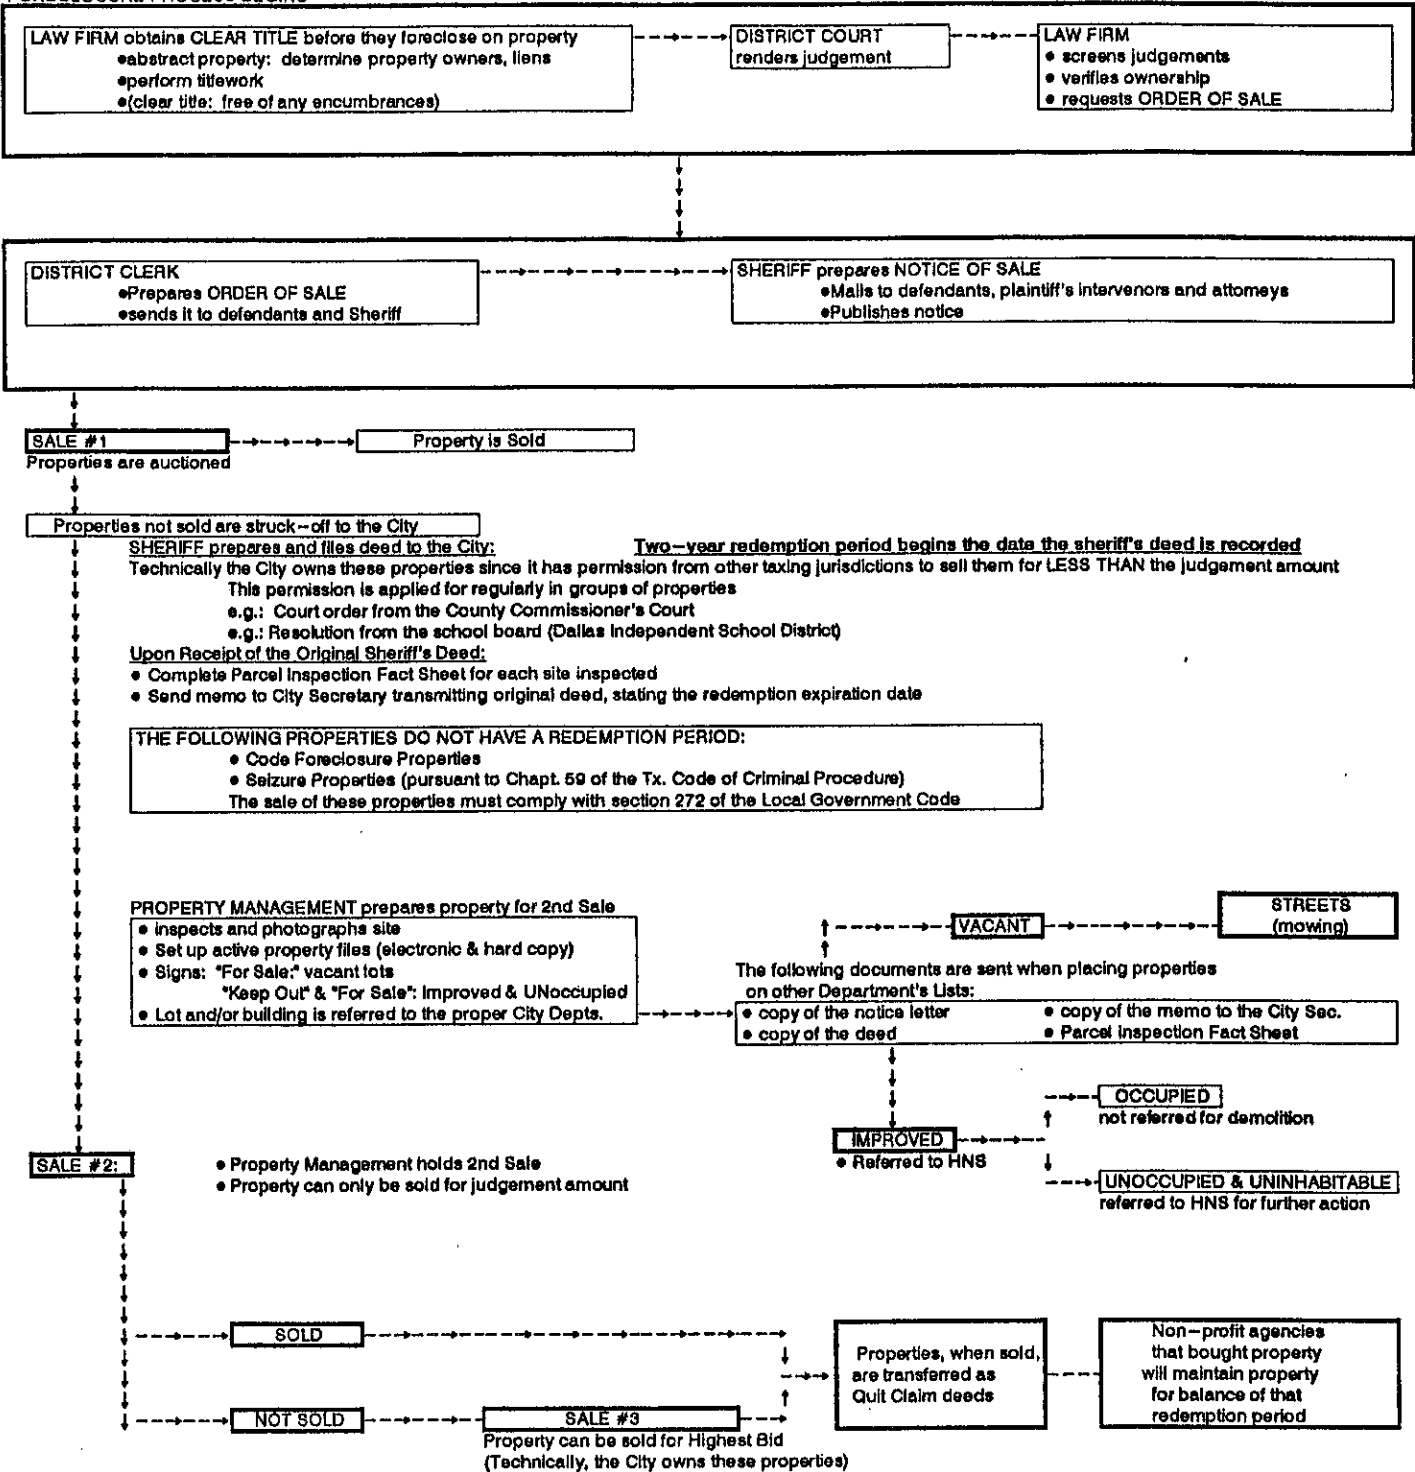

St. Louis and Baltimore demonstrate innovative handling of surplus and delinquent property. In St. Louis, if property is left unsold after an auction, it is referred to the state's Land Use Reutilization Authority. Baltimore and Philadelphia foreclose tax delinquent properties and prepare them for urban homesteading. Their approach differs in that Baltimore prioritizes properties on blocks with a few abandoned buildings, while Philadelphia targets homestead applicants who express interest in revitalizing the properties. Dallas operates a program to rehabilitate "problem" residential uses.

Unlike Houston, Dallas has a community receivership program that sifts through properties with structural code violations for possible revitalization (**Figure 9**). A check for tax liens and other liens confirms the property's problems and ownership. If the property is neither abated by the

FIGURE 8: DALLAS TAX CODE FORECLOSURE

Tax foreclosure is the primary vehicle to acquire property, specifically vacant lots, for Dallas' infill program for new construction in inner-city neighborhoods. Although a majority of the tax-foreclosed properties are in areas that tend to need revitalizing, Dallas' policy does not selectively enforce taxes more in one area than in others.

FORECLOSURE PROCESS BEGINS

FIGURE 9: CITY OF DALLAS COMMUNITY RECEIVERSHIP PROGRAM

Dallas' community receivership program, based on code violation property, targets abandoned houses and neighborhoods to revitalize. The program did not work until the city was able to make a substantial commitment of federal funds to fuel the rehabilitation of the buildings. Once a non-profit organization demonstrates an ability to successfully rehabilitate the homes, and/or construct low-income housing on a vacant lot, then private lenders are more likely to provide non-profit organizations with a line of credit in place of the public money.

Prepared by Research & Analysis Div., Planning & Development Dept., July 20, 1994

owner nor a homestead, but is residentially zoned and used, the Urban Standards Rehabilitation Board refers it for review by non-profit organizations. Expressed interest in rehabilitating the property puts the case before a hearing for receivership when a contacted owner fails to respond.

After the property is rehabilitated, an owner wishing to reclaim the property before the redemption period expires must pay all costs to the receiver and all taxes owed. Otherwise, the receiver gets title when the redemption period expires.

NOTES

- 1 Law firm indicates judgement and foreclosure action was faulty due to property and owner noticed. Law firm suggests rental payments be converted to potential tax payment agreement with occupant. Revenue & Taxation staff has temporarily suspended rental agreement pending Legal Dept. and law firm direction on this property. A full title search is being conducted by law firm.
- 2 Legal Dept. will determine direction City needs to take in this case considering the complications of faulty foreclosure and deed lost by current occupant of the property. Legal Dept. awaiting response from parties.

* Each property has obtained "Order of Sale," and has been through Constable's Sale

* Column Entitled: "Amount owed to City and County"

Source: Harris County Tax Assessor

Example: Harris County records show 4 years due beginning in 1989 and ending in 1993; total due including penalty and interest is XXXX.XX

F&A recommends that these values be updated every month

NOTES:

* To calculate the penalty and interest for taxes delinquent for a specified year, determine the delinquent month of payment and find the year the delinquent tax was initially owed. Multiply the rate with the tax initially owed to calculate penalty and interest; add result to the tax owed to determine the total payment due.

** TX Statute 33.05 ("Limits on Collection") prohibits collection on taxes that are delinquent for more than 20 years, as shown by the rates in this chart.

Notes prepared by Planning & Development Dept., 06/94.

TABLE B-2: PENALTY & INTEREST RATES APPLIED to a SAMPLE ACCOUNT*

July 15, 1994

HCAD Account No.	APPRAISED VALUE		Base Taxes Owed**	TAXES DELINQ. ON FEB. 1 OF (YEAR)	IF OWNER PAID IN ...			IF OWNER PAYS IN ...			
	LAND VALUE	IMPROVEMENT VALUE			TOTAL VALUE	JUNE 1993		GRAND TOTAL Tax Plus P&I	JUNE 1994		GRAND TOTAL Tax Plus P&I
						Penalty & Interest (P&I) Rate	Value of P & I		Penalty & Interest (P&I) Rate	Value of P & I	
Example : 190580000029					\$11,250	\$16,000	\$27,250	1970	CANNOT BE PURSUED ***		
					\$200.00			1973	1.935	\$387.00	CANNOT BE PURSUED ***
					\$200.00			1974	1.875	\$375.00	1.995 \$399.00 \$599.00
					\$144.60			1989	0.53	\$76.64	0.65 \$93.99 238.59
					\$144.60			1991	0.29	\$41.93	0.41 \$59.29 203.886
					\$144.60			1992	0.15	\$21.69	0.29 \$41.93 186.534
					TOTAL \$1,033.80			TOTAL	\$515.26	\$1,149.06	TOTAL \$594.21 \$1,228.01

* Calculations of penalty and interest do not exist in HCAD's database, but in the Harris County Tax Assessor's Database. For properties that are IN SUIT, taxes, court costs, and attorney fees ARE NOT AVAILABLE; until a judgment is rendered, the amount of penalty and interest attached to a property is correct. Once a judgment is granted in favor of a taxing jurisdiction (9), a separate file is created, which is not in the Tax Assessor's Database.

** BASE TAX: Taxable value (without any penalties or interest) multiplied by the tax rate. TAXABLE VALUE: value minus any exemptions; not necessarily the appraised value.

*** Statute 33.05: "Limitations on Collection" prohibits collection on delinquent taxes beyond 20 yrs.

PENALTIES AND FEES THAT CAN BE ATTACHED TO DELINQUENT AMOUNTS

TAX DELINQUENT DATABASE:

Penalty & Interest Rates for Delinquent Tax Collections:

Penalty starts accruing at 6% penalty and 1% interest; then, penalty stops accruing at 12%, but interest keeps accruing at 1% monthly and continues for 20 years unless it is paid. These rates apply to all properties, real and personal, for any taxing jurisdiction; each month the penalty & interest (P&I) rate increases by .01 or 1%

Attorney's Fees:

There are two methods of charging attorney's fees:

- 1) 33.07 City Ordinance: for years specified in ordinance (currently 1983 - 1993)
Amount of fee can NOT EXCEED 15% of total taxes, penalties & interest

Example
\$100,000 bill for taxes, penalties & interest
Attorney fees: \$15,000

- 2) Statute 33.48: fees awarded by the court (for years not covered in the ordinance)
Amount of fee must be reasonable, not to exceed 15%.

Example
\$100,000 bill for taxes, penalties & interest
Court awards reasonable costs to cover amount of hours worked; test for reasonable costs by judge is based on evidence of amount of actual work done.

IF: Previous owner does not pay judgment,
OR: Property is not sold
THEN: Law firm does not get paid.

TOTAL RECORDS	14,572
---------------	--------

* exists in Database at equal distances (midpoint) from beginning & end of data set

Source:

Penalty & Interest Database based on Original tapes from Finance & Administration, not HCAD;
Tapes included 1992 Tax Delinquent Data and 1992 HCAD Appraised Values.

APPENDIX D

TABLE D-1:

PROCEDURE & COST OF REDEEMING OR BUYING FORECLOSED PROPERTY

- **Judgement Amounts:** F&A does not have direct access to judgment amounts.
Judgment amounts can be obtained from the "Joint Venture," Herd Goggen et al., court house, and/or Legal Dept.
The judgment amount is probably LOWER than the figure the County has listed as owed.
- **Judgement occurs when Judgment is rendered In favor of the taxing jurisdictions**
BEFORE THE: Order of "Sale"
BEFORE THE: Constable's Sale"
(Taxes, penalty, & interest continue to accumulate until the property is "struck-off", i.e. decided to the City in trust, because the property was not sold at auction.)
BEFORE THE: property is struck-off
(A private interest did not pay all the delinquent taxes and applied penalties that were owed)
- **Redemption Fees are applied after a property has gone through: Judgment and Constable's Sale**
STRIKE-OFF amount: judgment AND accumulated costs such as court costs, constable's fees, etc.
REDEMPTION FEES: (Owner must pay.) 1st Year: Strike-off amount plus an additional 25% of strike-off amount
2nd Year: Strike-off amount plus an additional 50% of strike-off amount

FOR BUYER WISHING TO PURCHASE FORECLOSED PROPERTY

(Technically, penalty and interest would not apply to READY BUYER, who wishes to purchase property and pay "STRIKE-OFF" amount.)
F & A refers prospective buyers to law firm (Calame).

• Law firm will obtain copies of the following:

- 1) **Judgement:** (Delinquent taxes & Penalty & Interest that accrued leading up to the actual court case)
Penalty & Interest: Each month the penalty & interest (P & I) rate increases by .01 or 1 %
 - 2) **Added Costs:** Constable's Cost, abstract fee, court costs, attorney's fees
 - 3) **Judgment Interest:** Attorney's Fees: An additional 15% of total taxes, penalties & interest is charged when payment is made for lawyer fees
Accrues continually until property is paid for as a redemption
- However, F&A has expressed an interest to sell property for less than associated costs & redemption fees, simply to get property on the tax roll again.

FORECLOSURES & REVITALIZATION PROGRAMS IN SELECTED U.S. CITIES**

 = Nuisance/Demolition lien related foreclosure

(Cities are listed alphabetically)

CITY	Criteria for foreclosure	Typical amount of time	Redemption periods, the if unredeemed, the property is auctioned the city for the lowest bid that can cover the taxes and any administrative costs	Programs for Revitalization
ST. LOUIS	When a property is tax delinquent, the owner is notified and given a chance to pay any back taxes.	Entire time process: From tax delinq. notification to transfer of ownership to authority, ONE YEAR	if unredeemed, the property is auctioned the city for the lowest bid that can cover the taxes and any administrative costs	If property remains unsold after the auction: it goes to the state-established Land Reutilization Authority Planning Dept works with other city agencies & community groups to make the lot an asset to the neighborhood
ST. PAUL				Example Program: Summit Place St. Paul Housing & Redevelopment Authority acquired approximately two blocks of an abandoned urban neighborhood The City of St. Paul provided below-market-rate permanent financing (\$3.8 million at 8.75% & 9.75%) through the sale of revenue bonds. It also passed on federal money in the form of HUD Section 312 funds and credit-enhanced financing for rental housing. This public sector financing was seen as critical during a time of unusually high interest rates.

DALLAS VS. HOUSTON TAX FORECLOSURES

TAX FORECLOSED PROPERTIES

DALLAS VS. HOUSTON TAX FORECLOSURES					
CITY	TOTAL FORECLOSED FROM 12/90 TO 4/94	SOLD AT SHERIFF/ CONSTABLE'S SALE (1)	STRUCK-OFF (2)		
			TOTAL	Sold at City Sale (3)	Re-deemed
Dallas	Apprx. 1,524	1251	273	200 (4)	Apprx. 11
Houston	224	0	224	1 (Redemption period expires 10/15/94)	5
Notes: 1. Sheriff's Sale: (Dallas) properties transferred by sheriff's deed; also referred to as Sale #1. 2. Struck-off: Sheriff's Dept. prepares a deed and submits it to the City evidencing conveyance of title to the City (property was not sold at Sheriff's sale). 3. In Houston's case, it refers to offer made by buyer. 4. Property transferred by quit claim deed.					
SOURCES: Dallas: Phone Interview on 5/11/94 with Sr. Specialist, Property Mgmt. Houston: Tax Administration Sec., Finance & Administration, Dept., 4/94					

DALLAS

Text abstracted from the City of Dallas Quit Claim Deed Contract:

"Grantee expressly accepts the property in "as is" condition, with all its faults, if any, grantee releases any rights, at law or in equity, grantee may have against the City, County, and DISD, their officers, agents, and employees, in connection with this transaction, further grantee releases the City, County, and DISD, their officers, agents, and employees, from any and all claims and causes of action in connection with the bidding, terms, conditions, and sale of this property. This release also is binding on grantee's successors, heirs, and assigns. Grantee has had an opportunity to inspect the City in connection with the purchase of the property. Grantee expressly assumes responsibility for any environmental problems on or with the property. Grantee is liable for the prorata 199_ property taxes from the date of closing and in all future years grantee owns the property."

Can Dallas sell a foreclosed property to the former owner after the redemption period?

Judgements are converted to personal judgements against the former owner. At Sale #1, the sheriff's sale (See Figure 4: Dallas Tax Code Foreclosure), the sheriff offers the property for the amount owed against it. However, in Sale # 2 and # 3, in which the property can be sold for less than the amount of judgement, all bidders are "approved" through an affidavit which they must sign and notarize that states that they do not owe the City of Dallas any taxes. Each bidder is checked when the City opens the bid. The duration, from the time a bid is made to the actual property transfer ranges from 60 to 90 days. (City of Dallas, Property Management, June 9, 1994, Phone Interview).

What is "personal judgement"; is it enforced? How is future property ownership affected?

Personal judgements are court orders that legally bind one to satisfy a delinquent obligation. The abstract of the judgement, once filed, shows up on credit reports. Typically, before or after the judgement, creditors are in "line" with many other creditors wishing to collect payment. Most of these debtors may not have assets which can be seized and sold, despite the letters and phone calls to them demanding payment. (City of Houston Legal Department, Tax & Revenue Section, June 9, 1994, interview).

Generally, a personal judgement does not affect future property ownership. Individuals who are sellers, may not be concerned about a personal judgement against a prospective buyer (e.g.: selling property in exchange for goods such as a boat or cash). Corporations with judgements against them, however, may be concerned with declining credit ratings and their impacts, so would tend to pay off the judgement amount.

Does Dallas sell to non-profit agencies?

Properties are sold to the highest bidder. It is not the function of Property Management to inquire who the purchaser is. Dallas sells the vast majority of properties to individuals. Non-profit agencies are not a significant participant. Of the properties that were sold, six (6) properties have been bought by a City-sponsored non-profit agency, and five (5) or so to churches.

Does Dallas perform a title check when foreclosing property? If so, when?

Before Dallas forecloses on properties, a title check and abstract of property are done. Liens are uncovered, and lienholders notified, before foreclosing on property. Once foreclosed, the tax lien is a SUPERIOR LIEN and its title is transferred only as a quit claim deed.

The City of Dallas transfers its interest, and does not provide a "title policy." A *title policy* insures that the title to the property has no liens attached. A title policy can be costly because, in the event that someone challenges the title, the title-insuring company will guarantee to clear the problem, or pay the amount on the policy.

In Dallas' foreclosure process, how does the right of redemption affect title to a property?

As a matter of policy, the City of Dallas considers the title clear after the redemption period because Dallas uses the redemption period as a legal mechanism for removing the foreclosed owner's title (claim) to the property. "Long, lost" heirs as well as the foreclosed owner are denied any claim to the property after the redemption period.

HOUSTON

In Dallas' community receivership process, after the redemption period expires, the claims of previous property owners to the property are denied. Previous owners in Dallas, whether known or not, lose their rights to the property at the end of the redemption period. Can Houston adopt a similar policy?

If the "rightful" owners are NOT given proper notification about the foreclosure, the redemption period is NOT considered due process. Sometimes "owners" contacted by the City, are actually not the rightful owners. Tax-delinquent properties may not be necessarily abandoned. In many cases, the original owner thinks he/she still owns the property.

Houston, like some other cities in Texas, does not currently interpret the redemption period as a means of clearing the title on foreclosed property. Dallas, on the other hand, does because it is willing to assume the risk. If Houston adopts a policy similar to Dallas, it will risk being challenged by "owners" who believe their property rights, in effect, were denied. In such a challenge, the "owners" will probably be supported by constitutional law, according to the City's Legal Department. Dallas may not have had any lawsuits yet, but there are claims of improper notice.

The law firm abstracts the property searching for lienholders that are *of record*. While lienholders not of record could attempt to claim interest in the property after the redemption period, courts tend to favor ownership of record over such claims. In the situation where the law firm, contracted to do the City's tax collection, does not know who the legal owners are, it will sue by publication (i.e., post in newspapers throughout the country). Though a costly process, this is deemed proper notification for any heirs to the property, according to Dallas Property Management.

Such a policy consideration for Houston is best advised by the City's legal staff because property owners rights present constitutional law issues, including:

- An owner's property cannot be taken away from him/her without due process.
- Owner must have proper notification for any property seizure.
- Courts have to have jurisdiction over the person to take away his/her rights.
- Court has to have jurisdiction over the property (i.e., state court; federal court).

How does "faulty title" relate to tax foreclosures in Houston?

If the title to a property is not clear, foreclosure is not recommended. Many of Houston's current tax-foreclosed properties (as of March 1994) have faulty titles; they tend to be vacant lots. Title problems typically result from the following circumstances (examples):

- large families with many children, without proper owner estate distribution documents
- parents die without a will and assets get divided (evenly) among the surviving family
- all of the children do not agree to sell the property
- all of the children do not agree to maintain and/or pay taxes on the property

In Houston, what happens when the former owner wishes to redeem his foreclosed property, within the redemption period, after the property has already been sold?

If property is sold to a new owner before the redemption period begins (i.e. before the deed is legally filed) the former or foreclosed owner can redeem the property, if he/she is willing to pay the amount accumulated up to this point (base tax, penalty and interest). All properties sold, during the redemption period, are SUBJECT to the redemption laws of the State. The former owner wishing to redeem the property during the redemption period must pay the following costs, depending on when redeemed.

- First year: Total amount that was spent on the property and an additional 25%.
- Second year: Total amount that was spent on the property and an additional 50%.

Once the property has been sold, at the first sheriff's sale or any subsequent sales, or struck-off, the former owner has a vested right in buying back the property from the new owner or the City during the redemption period. If the new owner cannot be found, the former owner will pay the tax assessor, who will issue a receipt showing the property was redeemed, and it is recorded in the chain of title. The tax assessor will hold the money in trust. If the new owner can be located, the former owner can give the money and any redemption fees (total amount plus the 25% or 50% penalty) to him/her directly.

Can a former owner bid on/buy foreclosed property in Houston after redemption ends?

There is no prohibition against a former owner buying back foreclosed property after the redemption period has expired. It is allowed and it does happen once in a while. The owner would probably be required to pay the entire amount, consisting of judgment and additional costs. The other option the owner has is a sealed bid or a constable sale. In either case, the buyer could be rejected. F&A has started a sealed bid process, which comes with a written policy specifying the seller's right to reject any and all bids.

EMINENT DOMAIN

Does seizure by eminent domain clear titles?

In general, eminent domain can clear up any title question. It can also condemn any interest in property (City of Houston Legal Department, Real Estate Division). In Philadelphia, for titles that are unclear, the city will exercise its eminent domain authority to make them available for homesteading. Philadelphia has instituted several programs designed to revitalize abandoned and otherwise vacant property: a gift property program, a non-utilization tax on vacant and abandoned buildings, donor-taker law, and a city ordinance that allows the City to declare vacant and abandoned property as public nuisances and take it over. (No additional information was available in the article: "City Land Sales," The Neighborhood Works, April 1983)

To acquire properties through eminent domain, the City of Houston would have to pass an ordinance to take each property, stating its need for a specific property in a particular location for public use, welfare, safety, or health.^{1, 2} Eminent domain cannot be used unless the property is needed for city purposes. Furthermore, acquiring property through the eminent domain procedure is very expensive. According to Houston sources, approval to seize properties containing dangerous buildings by eminent domain is typically more difficult to obtain once the lot has been cleared, and the dangerous structure is no longer present as evidence. Once the demolition removes the dangerous building nuisance, an enforceable judgement placed on the property requires the owner to pay the judgement amount. If the owner refuses, then the property is posted and sold to pay the judgement.

How did Boston acquire the right for non/-profit organizations (NPOs) to be authorized as land-taking entities?

"The power of eminent domain has long been used by municipal governments and transportation agencies to take property (at fair market value) for public purposes such as to remove 'slums', to build highways, or to rebuild declining downtown areas." In November 1988, the Boston Redevelopment Authority authorized the "Dudley Street Neighborhood Initiative" (DSNI) to use the eminent domain power to acquire vacant land in its community. A clause in the State of Massachusetts enabling legislation allows NPOs to take land for public benefit, authorizing the acquisition of any vacant parcel in a section of a neighborhood with over 15 acres of privately held, vacant land. The awarding of eminent domain authority is the culmination of four years of intensive community organizing. (Arthur Girard, "Boston Group Pioneers Use of Eminent Domain," The Neighborhood Works, April/May 1989).

¹"Inverse Condemnation" by Marlin Smith. Eminent domain is the power of a government to compel private property owners to sell their property to the governing body either for public use or in aid of a purpose that will promote the health, safety and welfare of the public. The fifth Amendment allows the taking of property, but only with just compensation.

²"The Eminent Domain Case from the Condemnor's Viewpoint: Seizing the Advantage". The article outlines the methods by which attorneys representing condemnors (not the landowners) can gain the advantage in an eminent domain case. Trial by jury is not recommended. Included are synopses of several Texas cases.
